

# Wesley van der Kraan

Full-Stack Developer (Front-end & Back-end) - Stagiair

I'm excited to apply for the position of **Backend Node.js Developer** at Luscii. As someone passionate about building meaningful software and improving digital healthcare, your mission to create space for care truly resonates with me. Luscii's impact-driven, remote-first culture and your focus on innovation through autonomy and collaboration align strongly with my personal values and career goals.

Over the past year, I've grown from a junior full-stack developer into a confident backend engineer, with hands-on experience building real-world applications using **Node.js**, **Express.js**, and **PostgreSQL**. During my internship, I was part of a team responsible for refactoring backend logic, improving API structure, and implementing access control systems within a healthcare-related platform. I also collaborated on a full-stack feature that involved filtering templates based on domain access, extending existing APIs, and coordinating frontend integration.

Beyond my internship, I've worked on several personal projects, including:

- **Esportique**: a headless e-commerce storefront powered by **Medusa.js** (Node.js-based), where I implemented **custom API routes**, database logic, and multi-vendor workflows.
- **AP Gaming Dashboard**: a platform for team management, role-based access, and content control — built with a full authentication and permissions system.

I take pride in writing **clean, maintainable code**, enjoy solving complex problems, and continually challenge myself to learn new patterns, tools, and technologies. I'm especially drawn to Luscii's approach to **distributed teams**, your **holacracy model**, and the emphasis on continuous growth — both personal and technical. I believe my experience with microservice-like logic, my eagerness to collaborate, and my strong interest in healthcare tech would make me a valuable addition to your team.

I would love the opportunity to discuss how I could contribute to Luscii's mission and help shape the future of digital health. Thank you for your time and consideration — I hope to hear from you soon.

Warm regards,

**Wesley van der Kraa**
